

## Home energy audit

An assessment of your energy use at home – an energy audit - can allow you to identify changes which will reduce energy consumption and thus reduce your greenhouse gas production. The changes can also save money on energy costs. You can do a home energy audit yourself or you might choose to use the services of an adviser. Here are some suggestions.

### Do it yourself

#### Printed pamphlet

*Home Energy Self Audit*, obtainable from Energy SA , the energy division of the Department of Transport, Energy and Infrastructure. The office is located at Energy SA, 11 Waymouth Street, Adelaide. Energy SA has a number of other publications relevant to energy saving. Further information and advice is available from the Energy Division's Advisory Service on 8204 1888. email [energy.sa@saugov.sa.gov.au](mailto:energy.sa@saugov.sa.gov.au)

#### Internet

Publications regarding energy can be found at [dtei.sa.gov.au/energy/publications.html](http://dtei.sa.gov.au/energy/publications.html) including a Home Energy Worksheet.

#### Toolkits

Most public libraries hold Home Energy Toolkits containing a range of pieces of equipment. Ask your local library or see the list of Toolkit locations at [www.dtei.sa.gov.au/energy/energy\\_action/household/saving\\_energy/home\\_energy\\_audit](http://www.dtei.sa.gov.au/energy/energy_action/household/saving_energy/home_energy_audit) link to [Public libraries with a Home Energy Toolkit](#).

### Expert advice

Several professional advisers are listed here and there will be others in Adelaide. Sustainable Communities SA is not able to make a specific recommendations and it is expected that householders make their own judgment and negotiate the terms of the consultation.

**Ashley Campbell** - energy and water audits; solar engineering, appropriate technology, tel. 8297 6249

**Nat Elliott** - home energy and water reviews, tel. 8178 0867, 0447 138 065
